Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkin et al (WO 91/16530) in view of Stewart (3748925).

Atkin et al show (fig.1) crankshaft with helical gears 15. However, there are no split crank webs. Stewart teaches using split crank webs (figs. 3, 7) because they provide easier manufacturing and accurate balancing. While the balance weights are welded onto the crankshaft, they are nevertheless removable, albeit with difficulty. It would have been obvious to one of ordinary skill in the art to use split webs in Atkin et al for easier manufacturing in view of Stewart.

Claims 1-9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkin et al (WO 91/16530) in view of Mitsubishi (JP 58-91917).

Atkin et al show (fig.1) crankshaft with helical gears 15. However, there are no split crank webs. Mitsubishi discloses a split webs with removable weights that has the advantage of easily selecting the desired balancing characteristics. It would have been obvious to one of ordinary skill in the art to split webs in Atkin et al for flexible balancing in view of Mitsubishi.

Allowable Subject Matter

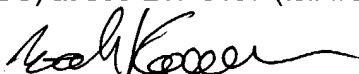

Claims 10, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
